SUBJECT INDEX TO VOLUME 49

Algebraic Multigrid Preconditioned Krylov Subspace Methods for Fluid Flow and Heat Transfer on Unstructured Meshes, 197

An Enhanced Additive Correction Multigrid Method, 395

An Immersed Boundary Method on Unstructured Cartesian Meshes for Incompressible Flows with Heat Transfer, 277

Analysis of Different Numerical Schemes for the Resolution of Convection-Diffusion Equations using Finite-Volume Methods on Three-Dimensional Unstructured Grids. Part I: Discretization Schemes, 333

Analysis of Different Numerical Schemes for the Resolution of Convection-Diffusion Equations using Finite-Volume Methods on Three-Dimensional Unstructured Grids. Part II: Numerical Analysis, 351

Application of a Novel Moving-Grid Methodology to Model the Interaction of a Synthetic Jet with a Turbulent Boundary Layer, 105

Comparison of Two Nonlinear Model Reduction Techniques: The Modal Identification Method and the Branch Eigenmodes Reduction Method, 537

Comparisons Between 2-D and 1-D Formulations of Heat and Mass Transfer in Rotary Regenerators, 223

Convective Schemes for Capturing Interfaces of Free-Surface Flows on Unstructured Grids, 19

Discretization of Lorentz Force Term, 599

General Sensitivity Equation Formulation for Turbulent Heat Transfer, A, 125

Heat and Mass Transfer in Moist Soil, Part I. Formulation and Testing, 467

Heat and Mass Transfer in Moist Soil, Part II. Application to Predicting Thermal Signatures of Buried Landmines, 487

Hybrid FE-FD Scheme for Solving Parabolic Two-Step Micro Heat Transport Equations in an Irregularly Shaped Three-Dimensional Double-Layered Thin Film, A, 437

Hybrid Three-Dimensional Supercompact Multiwavelets for Computational Fluid Dynamics, 377

Least-Squares Collocation Meshless Approach for Coupled Radiative and Conductive Heat Transfer, 179

Modeling Lifted Methane Jet Fires Using the Boundary-Layer Equations, 239

Modeling Moving-Boundary Problems of Solidification and Melting Adopting an Arbitrary Lagrangian-Eulerian Approach, 299

Multiple Absorption Coefficient Zonal Method (MACZM), an Efficient Computational Approach for the Analysis of Radiative Heat Transfer in Multidimensional Inhomogeneous Nongray Media, The, 89

New Computational Method for Free Surface Problems, A, 409
New General Convective Boundedness Criterion, A, 585
New Inverse Method Using Model Synthesis: Application to Thermal Systems, A, 513
Novel and Efficient Method for Particle Locating and Advancing over Deforming, Nonorthogonal Mesh, A, 67
Numerical Results Using a Colocated Finite-Volume Scheme on Unstructured Grids for Incompressible Fluid Flows, 259
Numerical Simulation of Two-Fluid Two-Phase Flows by HLL Scheme Using an Approximate Jacobian Matrix, 155

Parallelization of the P-1 Radiation Model, 1
Pressure-Correction Method for Incompressible Flows Using Unstructured Meshes, A, 43

Thermal Characterization of Resistance Spot Welding, 559

CONTENTS TO VOLUME 49

CONTENTS Vol. 49, No. 1

1 Parallelization of the P-1 Radiation Model **Gautham Krishnamoorthy, Rajesh Rawat, and Philip J. Smith**

19 Convective Schemes for Capturing Interfaces of Free-Surface Flows on Unstructured Grids **M. Darwish and F. Moukalled**

43 A Pressure-Correction Method for Incompressible Flows Using Unstructured Meshes **Yeng-Yung Tsui and Yeng-Feng Pan**

67 A Novel and Efficient Method for Particle Locating and Advancing over Deforming, Nonorthogonal Mesh **A. M. Vaidya, P. M. V. Subbarao, and R. R. Gaur**

CONTENTS Vol. 49, No. 2

89 The Multiple Absorption Coefficient Zonal Method (MACZM), an Efficient Computational Approach for the Analysis of Radiative Heat Transfer in Multidimensional Inhomogeneous Nongray Media **Walter W. Yuen**

105 Application of a Novel Moving-Grid Methodology to Model the Interaction of a Synthetic Jet with a Turbulent Boundary Layer **K. Navaratnam, Dong-Dae Lee, and Siva Parameswaran**

125 A General Sensitivity Equation Formulation for Turbulent Heat Transfer **E. Colin, S. Étienne, D. Pelletier, and J. Borggaard**

155 Numerical Simulation of Two-Fluid Two-Phase Flows by HLL Scheme Using an Approximate Jacobian Matrix **Geum-Su Yeom and Keun-Shik Chang**

179 Least-Squares Collocation Meshless Approach for Coupled Radiative and Conductive Heat Transfer **J. Y. Tan, L. H. Liu, and B. X. Li**

CONTENTS Vol. 49, No. 3

197 Algebraic Multigrid Preconditioned Krylov Subspace Methods for Fluid Flow and Heat Transfer on Unstructured Meshes **Qinghua Wang and Yogendra Joshi**

223 Comparisons Between 2-D and 1-D Formulations of Heat and Mass Transfer in Rotary Regenerators **L. A. Sphaier and W. M. Worek**

239 Modeling Lifted Methane Jet Fires Using the Boundary-Layer Equations **P. S. Cumber and M. Spearpoint**

259 Numerical Results Using a Colocated Finite-Volume Scheme on Unstructured Grids for Incompressible Fluid Flows **E. Chénier, R. Eymard, and O. Touazi**

277 An Immersed Boundary Method on Unstructured Cartesian Meshes for Incompressible Flows with Heat Transfer **Dartzi Pan**

CONTENTS Vol. 49, No. 4

299 Modeling Moving-Boundary Problems of Solidification and Melting Adopting an Arbitrary Lagrangian-Eulerian Approach **V. Kumar, F. Durst, and S. Ray**

333 Analysis of Different Numerical Schemes for the Resolution of Convection-Diffusion Equations using Finite-Volume Methods on Three-Dimensional Unstructured Grids. Part I: Discretization Schemes **C. D. Perez-Segarra, C. Farre, J. Cadafalch, and A. Oliva**

351 Analysis of Different Numerical Schemes for the Resolution of Convection-Diffusion Equations using Finite-Volume Methods on Three-Dimensional Unstructured Grids. Part II: Numerical Analysis **C. Farre, C. D. Perez-Segarra, M. Soria, and A. Oliva**

377 Hybrid Three-Dimensional Supercompact Multiwavelets for Computational Fluid Dynamics **Hyungmin Kang, Dongho Lee, and Dohyung Lee**

395 An Enhanced Additive Correction Multigrid Method **Biswadip Shome**

CONTENTS Vol. 49, No. 5

409 A New Computational Method for Free Surface Problems **Jeremy Rice and Amir Faghri**

437 A Hybrid FE-FD Scheme for Solving Parabolic Two-Step Micro Heat Transport Equations in an Irregularly Shaped Three-Dimensional Double-Layered Thin Film **Brian R. Barron and Weizhong Dai**

467 Heat and Mass Transfer in Moist Soil, Part I. Formulation and Testing **F. Moukalled and Y. Saleh**

487 Heat and Mass Transfer in Moist Soil, Part II. Application to Predicting Thermal Signatures of Buried Landmines **F. Moukalled, N. Ghaddar, Y. Saleh, and Z. Fawaz**

CONTENTS Vol. 49, No. 6

513 A New Inverse Method Using Model Synthesis: Application to Thermal Systems **Afef Gafsi and Gilles Lefebvre**

537 Comparison of Two Nonlinear Model Reduction Techniques: The Modal Identification Method and the Branch Eigenmodes Reduction Method **Etienne Videcoq, Alain Neveu, Olivier Quemener, Manuel Girault, and Daniel Petit**

559 Thermal Characterization of Resistance Spot Welding **Tahar Loulou, Philippe Le Masson, and Philippe Rogeon**

585 A New General Convective Boundedness Criterion **Jin-Jia Wei, Bo Yu, Wen-Quan Tao, and Yasuo Kawaguchi**

599 Discretization of Lorentz Force Term **Myung Jong Cho**
